THE EETD REFERENCE SECTION

JANUARY 1989

THE EETD REFERENCE SECTION

Organization

The books have been placed into "sections" on the basis of topics. In those cases where a document covers more than one topic, the primary topic (or application to EETD) has been used as the criteria. When this was not possible, the document was often put into the "Oil Spills - General" or "Hazardous Materials Spills General" sections.

A given section is organized on the actual shelf in terms of the date (or estimated date) of publication. The earliest material appears on the left and vice versa. All documents have been labelled with a sticker bearing the name of the section as well as a number. This has been done to aid you in the replacement of library materials back on the shelf. Also, the enclosed listing also appears in the same order as the materials does on the shelf. We also have a Microfiche section which is located at the Microfiche machine. This is organized in the same way as the hard-copy material.

Old books are located in the archival section in the east laboratory. They are marked with an A before their number both on their listing and on the books themselves.

Use of the Reference Section

I would greatly appreciate it if users would be kind enough to observe the following (since correction usually requires a lot of my personal time):

1. Please do not keep books for great lengths of time. It would be preferable if you borrow books as you need them and then return them when you are finished.
2. Please replace books neatly and in the order that they originally were.
3. Please do not lend books to individuals outside the branch (Our past experience with this has been that no one has ever returned all the books borrowed). I would suggest that we avoid the problem by inviting outsiders to use the reference material in this office or by photocopying the relevant sections. Many of the documents we have are impossible or very difficult to replace and if we want to maintain a reliable and well-stocked information center, we cannot afford to loose all our good materials.
4. Please sign out books which you will be keeping for longer than an hour or two.
5. Please do not take out material needed for real time emergency response. This includes books in the Handbooks-Chemistry, the Haz Mat Handbook sections; and the material on the top shelves.

We have an impressive collection on the subject - over 4,000 documents. It is, I believe, the only collection of its kind in the world. I look forward to your help in maintaining this collection.

Mervin Fingas
January 1989

TABLE OF CONTENTS

Library Section	Page
Activity Reports	1
Arctic Environment - General	5
Arctic Spills and Countermeasures	13
Beach Cleanup	20
Bibliographies	24
Biodegradation of Oil in the Environment	26
Chemistry - General	28
Computer Systems	30
Conferences - Symposium Proceedings	31
Contingency Planning	36
Detection and Monitoring	40
Dispersants	42
